

Delivering Excellence

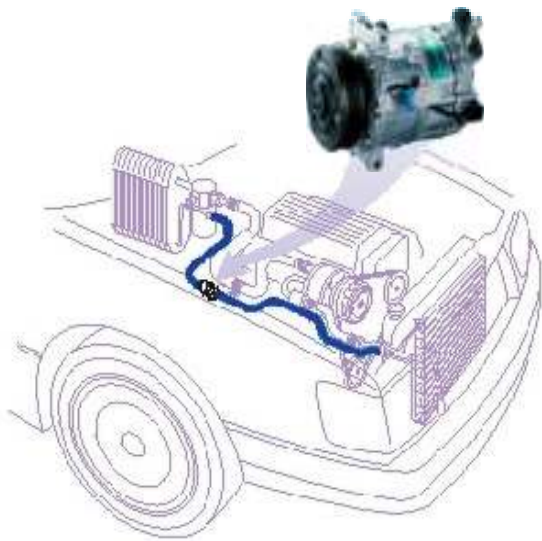

AUTOMOTIVE A/C Compressors

just when you need it most...

SANDEN INTERNATIONAL (USA), INC.
601 S. Sanden Blvd., Wylie, TX 75098 • Tel: (01) 972-442-8400 • Fax: (01) 972-442-8700
Website: www.sanden.com

The Sanden Advantage

Sanden is a premier innovator and manufacturer of compressors for mobile HVAC applications. Sanden has been producing automotive compressors for the world's top vehicle manufacturers for over 30 years. With facilities around the globe, Sanden has a diverse technical support network to support the global automotive marketplace.

Whether the application is for light vehicle, heavy truck, or off-highway vehicles, Sanden builds a new, high quality compressor that exceeds customer expectations. Sanden has achieved the highest quality certifications and customer performance awards. Our ultimate goal is to deliver excellence to our customers.

Why Choose New Over Remanufactured?

- ***Superior Parts***

Sanden compressors are manufactured with superior quality parts and castings that are machined to OEM specifications. Remanufactured compressors are made from a used compressor core and used or non-OEM approved parts. These used and out of spec parts will degrade the cooling performance of the compressor.

- ***Superior Quality Control***

Sanden has quality systems that are registered to the highest automotive OEM standards: ISO9001:2002, ISO14001, and TS-16949. Our manufacturing and quality control processes are audited by the largest vehicle manufacturers in the world to ensure that the highest quality standards are maintained. Remanufactured compressors are not tested to OEM specifications and are not built with the same rigorous quality checks as a new Sanden compressor.

- ***Product Availability***

Remanufactured compressors rely on the availability of used cores to support the remanufacturing process. If used cores are not available, remanufactured compressors can not be produced. New Sanden compressors are produced at several manufacturing facilities all over the world to quickly support customer demand.

- ***Increased Customer Satisfaction***

You might save a few dollars with a remanufactured compressor, but is the cost savings worth losing your customers? Reman units that start with used cores and are refurbished with questionable parts and processes will not last as long as a new Sanden compressor. The price gap between reman and new continues to shrink. When you consider the benefits, the value of a new compressor is clearly superior to remanufactured.
